ACS Launches New Website

TUCSON, AZ—July 11, 2008—ACS International, Inc. announces the release of a new company web site. Included in the revised site are new product selections and added features for a wider audience.

The new web site released by ACS International includes products previously not marketed by the company such as its **Stone Flakes™** acrylic flake product and **Foam-Bond™** a line of expanding urethane foam that expands as it cures, while bonding surface areas. Also included in the new web site are several specialty add-in materials allowing for a wider range of consumers access to its products.

In addition to enhanced product listings, ACS has included new service areas on its web site. The first is the **Color Corner™** that provides color trend information to fabricators, manufactures, and homeowners as well as a separate page dedicated to the discussion on Green manufacturing.

“The new site speaks to ACS’s expanding customer base,” says Greg Novak President of ACS International. “It is our goal to make the ACS website a useful tool to assist our customers in marketing, technical information, and current colors trends. This site is continually updated and contains the latest information and updates to all manuals, brochures, and data sheets. It should be a great resource for both manufacturers and consumers.”

About ACS

Established in 1988, ACS International, Inc. is a privately owned company located in Tucson, Arizona. The facility includes crushing and blending equipment along with a comprehensive laboratory, ensuring quality control and advancements in research and development in all our product lines. ACS domestically manufactures a broad range of products including; Terra Bella™ engineered granite using natural stones, GraniteFX™ textured silicone, Poly Stone™ spray granite, Dura Stone® a solid surface filler, Poly Chips® a solid surface chip(s) component, Granite Fill 2000 a natural mineral based cast granite filler, Featherlite® an ultra-light series of fillers.
