

Artistone™

Cultured Granite Applications

- Bathroom Vanities
- Tubs
- Showers
- Shower Surrounds
- Wall Panels
- Furniture
- Display bases

*I*nspired by a symphony of natural granite tones, Artistone™ offers an array of exceptional colors—without the cost associated with natural stone products. Artistone is a cultured granite product designed for use behind gel coat. The result is a luxurious, high-sheen finish that lasts.

Spending exuberant amounts of money on natural granite is unnecessary when the beauty and selection can be achieved by using Artistone. Unlike many other cultured stone products available, Artistone uses a quality calcium carbonate base, enabling the look of natural granite. Artistone is an excellent choice for a variety of applications including; bathroom vanities, tubs, showers and shower surrounds, wall panels, furniture, and trophy bases.

Currently, twenty-four colors are offered using a patented process for consistent, quality colors in addition to enhanced product performance. For more information, please contact ACS or your local distributor for more details. See reverse side for color pallet.
