## **New Look for Stone Flakes™** Acrylic Chips for Granite Textures

**TUCSON, AZ—July 18, 2008**—ACS International, Inc. announces the revamp of its Stone Flakes™ product line of spray or cast acrylic flakes. The new line contains five new pre-blended colors as well as a larger ¼ inch size in select solid colors.

Included in several of the new Stone Flake colors are unique ingredients designed to enhance the appearance and overall affect the colors. Stone Flakes are offered in pre-blended and solid color selections with the standard pre-blended colors in the D size range (12 to pan mesh range). The flat shape (5 mils thick) of the chip enables users to use less material while covering a larger surface area such as in swimming pool applications.

“ACS decided to update the Stone Flakes line as a means of offering customers an up-to-date look in the line” says Jack Simmons, vice president of sales for ACS International. Mr. Simmons goes on to say “Some exciting colors can be created with the numerous solid colors while combining them (solid Stone Flakes) with Poly Chips or other add-in ingredients.”

### **About ACS**

Established in 1988, ACS International, Inc. is a privately owned company located in Tucson, Arizona. The facility includes crushing and blending equipment along with a comprehensive laboratory, ensuring quality control and advancements in research and development in all our product lines. ACS domestically manufactures a broad range of products including; Terra Bella™ engineered granite using natural stones, GraniteFX™ textured silicone, Poly Stone™ spray granite, Dura Stone® a solid surface filler, Poly Chips® a solid surface chip(s) component, Granite Fill 2000™ a natural mineral based cast granite filler, Featherlite® an ultra-light series of fillers. For more information, please contact ACS at 1-800-669-9214 or visit [www.acstone.com](http://www.acstone.com).
