## **Enhanced ATH Offered by ACS International AC-25MSP**

**TUCSON, AZ—December 22, 2008**—ACS International, Inc. announces the release of a newly engineered alumina tri-hydrate (ATH) to the U.S. market. The new AC-25MSP is a high whiteness ATH with super low resin demand. This makes it ideal for many casting applications where high filler loading, or reduced air entrapment is desired.

Produced by the leading supplier of ATH in China, Chalco Shandong International Trading Co. has an established record of offering consistent and reliable products without swings in color and performance. In addition to the  $\geq 95\%$  whiteness specifications, the AC-25MSP is under 60 mesh in granular size with a mean particle size of 25 micron.

“We are confident that our customers will enjoy the benefits of this high quality and very affordable product,” says Greg Novak, President of ACS International. “We have worked with Chalco for some time to develop an ATH that would meet the high expectations of our customers and the AC-25MSP is just that.”

### **About ACS**

Established in 1988, ACS International, Inc. is a privately owned company located in Tucson, Arizona. The facility includes crushing and blending equipment along with a comprehensive laboratory, ensuring quality control and advancements in research and development in all our product lines. ACS domestically manufactures a broad range of products including; Terra Bella™ engineered granite using natural stones, GraniteFX™ textured silicone, Poly Stone™ spray granite, Dura Stone® a solid surface filler, Poly Chips® a solid surface chip(s) component, Granite Fill 2000™ a natural mineral based cast granite filler, Featherlite® an ultra-light series of fillers. For more information, please contact ACS at 1-800-669-9214 or visit [www.acstone.com](http://www.acstone.com).
