## **New Natural Stone Product for Spray Applications** Spray Version of Terra Bella™

**TUCSON, AZ—January 8, 2009**—ACS International, Inc. announces the release of a spray version of its popular Terra Bella line of engineered granite (patent pending). Using smaller particle sizes, Spray Terra Bella does not require special tip sizes or equipment for spraying and uses standard industry gel coat.

Designed to be applied behind a clear layer of gel coat, Spray Terra Bella is ideally suited for wall panels, shower surrounds, vanity molds, decks, tubs and nearly any cast polymer surface application. Each of the ten colors developed uses many of the natural stones used in the cast version of Terra Bella, including semi-precious gemstones and minerals.

“We’re recommending customers use simple cup guns for this product” says Don Hay, Customer Support Representative for ACS International, “Though the stones are no larger than our large chip Poly Stone™ product line, the specific gravity is different and sprays unlike synthetic products on the market. The look is unique and unlike synthetic products offered.”

### **About ACS**

Established in 1988, ACS International, Inc. is a privately owned company located in Tucson, Arizona. The facility includes crushing and blending equipment along with a comprehensive laboratory, ensuring quality control and advancements in research and development in all our product lines. ACS domestically manufactures a broad range of products including; Terra Bella™ engineered granite using natural stones, GraniteFX™ textured silicone, Poly Stone™ spray granite, Dura Stone® a solid surface filler, Poly Chips® a solid surface chip(s) component, Granite Fill 2000™ a natural mineral based cast granite filler, Featherlite® an ultra-light series of fillers. For more information, please contact ACS at 1-800-669-9214 or visit [www.acstone.com](http://www.acstone.com).
