New Terra Bella™ Engineered Granite Colors

TUCSON, AZ—January 14, 2010—ACS International, Inc. announces the release of eleven new colors to its Terra Bella (patent pending), engineered granite product line to be released in the Composites 2010 trade show in Las Vegas, Nevada. The Terra Bella line is an engineered granite material using natural ingredients including precious, semi-precious gemstones, and exotic minerals.

“Since the products’ inception in late 2007, the Terra Bella line has taken off and increased in popularity dramatically, despite a weak building market,” says Greg Novak, President of ACS International. “Many colors in the new line-up we developed from feedback from our customers, along with newly discovered mica laden granites. The results are stunning and offer something that is highly competitive looking to natural granite.”

Independent laboratory tests verify products made with Terra Bella (behind gel coat) pass thermal cycle testing. Applications for this product include vanities, tubs, tub/shower surrounds, furniture, wall panels, shower bases, among others.

About ACS

Established in 1988, ACS International, Inc. is a privately owned company located in Tucson, Arizona. The facility includes crushing and blending equipment along with a comprehensive laboratory, ensuring quality control and advancements in research and development in all our product lines. ACS manufactures a broad range of products including; Ecotone Surfaces post-consumer recycled filler line, the patent pending Terra Bella™ engineered granite filler line, GraniteFX™ textured silicone, Poly Stone™ spray granite, Dura Stone® a solid surface filler, Poly Chips® a solid surface chip(s) component, Featherlite® an ultra-light series of fillers. For more information, please contact ACS at 1-800-669-9214 or visit www.acstone.com.
