ACS Releases a New Recycled Product for the Cast Polymer and Solid Surface Industries

Ten Colors in the Ecotone™ Product Line

TUCSON, AZ—August 20, 2009—ACS International, Inc. announces a new product line called Ecotone™ Surfaces with ten colors for immediate release. Designed as a pre-blended filler for open mold applications, the Ecotone product line uses post-consumer recycled content.

“The market demand for a product using a high percent of recycled material has continued to increase,” says Greg Novak, president of ACS International.

“We chose to stay with post-consumer recycled glass as the main ingredient in order to provide designers and builders with a product capable of acquiring a higher level of LEED® points, as well as its stunning aesthetics. Combined with bio-resins, end parts made with Ecotone material will accomplish this goal.”

Ecotone
Surfaces™
post-consumer recycled fillers

Within the initial Ecotone color pallet there are eight colors using post-consumer recycled bottle glass in concentrations ranging from 80 to 90% by weight. In addition, two Ecotone colors contain organic material derived from consumer by-products.

About ACS

Established in 1988, ACS International, Inc. is a privately owned company located in Tucson, Arizona. The facility includes crushing and blending equipment along with a comprehensive laboratory, ensuring quality control and advancements in research and development in all our product lines, ACS manufactures a broad range of products including; the patented Terra Bella™ engineered granite filler line, GraniteFX™ textured silicone, Poly Stone™ spray granite, Dura Stone® a solid surface filler, Poly Chips® a solid surface chip(s) component, Granite Fill 2000 a natural mineral based cast granite filler, Featherlite® an ultra-light series of fillers.
